Data in Brief has created a special collection of data articles relevant to the ongoing fight against the COVID-19 pandemic. The journal welcomes submission of manuscripts describing any dataset that furthers our understanding of any aspect of the disease and its management.

In order to allow authors to publish their data article rapidly and without impediment the journal will waive the Article Publication Charge (APC) for any COVID-19 paper accepted for publication in this collection.

- Authors should use this template (https://www.elsevier.com/dib-template) to write their manuscript.

- The manuscript must be clearly written in English and contain only original work.

- We strongly encourage authors to make their submission publicly available as a preprint prior to submission and during peer review.

- We also strongly encourage authors to deposit their data in a trusted data repository prior to submission. See our list of supported data repositories (https://www.elsevier.com/authors/author-resources/research-data/data-base-linking#repositories).

- All papers will be peer reviewed by independent reviewers.

Submission deadline: 31st July 2020.

For preparation of manuscripts please visit our guide for Authors page
